

TECHNICAL DEVELOPMENT OF LDz INFRASTRUCTURE

Continuation of Annex 2.1.B

No.	Name	TAFTAP Primary code	Information on technical development of the registration unit							Information on technical development of LDz infrastructure between registration units									
			Registration unit code in LDz information systems (KIGAS, SAP, DWH)	Registration unit code (SMGS, TP4)	Registration unit code (CIM)	LDz border point code (CIM)	Record point type	Number of roads at the counting point	Centralization system ("DC/EC" - centralized exchanges with microcentralization; "MC" - non-centralized exchanges)	No.	Name of the section / connecting tracks	Number of tracks in the section / connecting track (I, II or DC - multi-track)	Section / connecting road road names	Section / connector road code in information systems (KIGAS, SAP, DWH)	Electrified lines (YES or NO)	Station equipment ("DC/AE" - dispatcher centralization with auto-locking system; "DC/AB" - dispatcher centralization with auto-locking system; "DC/AB" - dispatcher centralization with auto-locking system; "AB" - semi-automatic blocking system; "AB" - automatic blocking system; "MN" - movement organized by dispatcher order system; "MN" - movement organized by maneuver formations)	Distance between recording points (km)	passenger train traffic	In cargo, agricultural train and locomotive movement.
