

Rail Baltica state of play and synergies with 1520

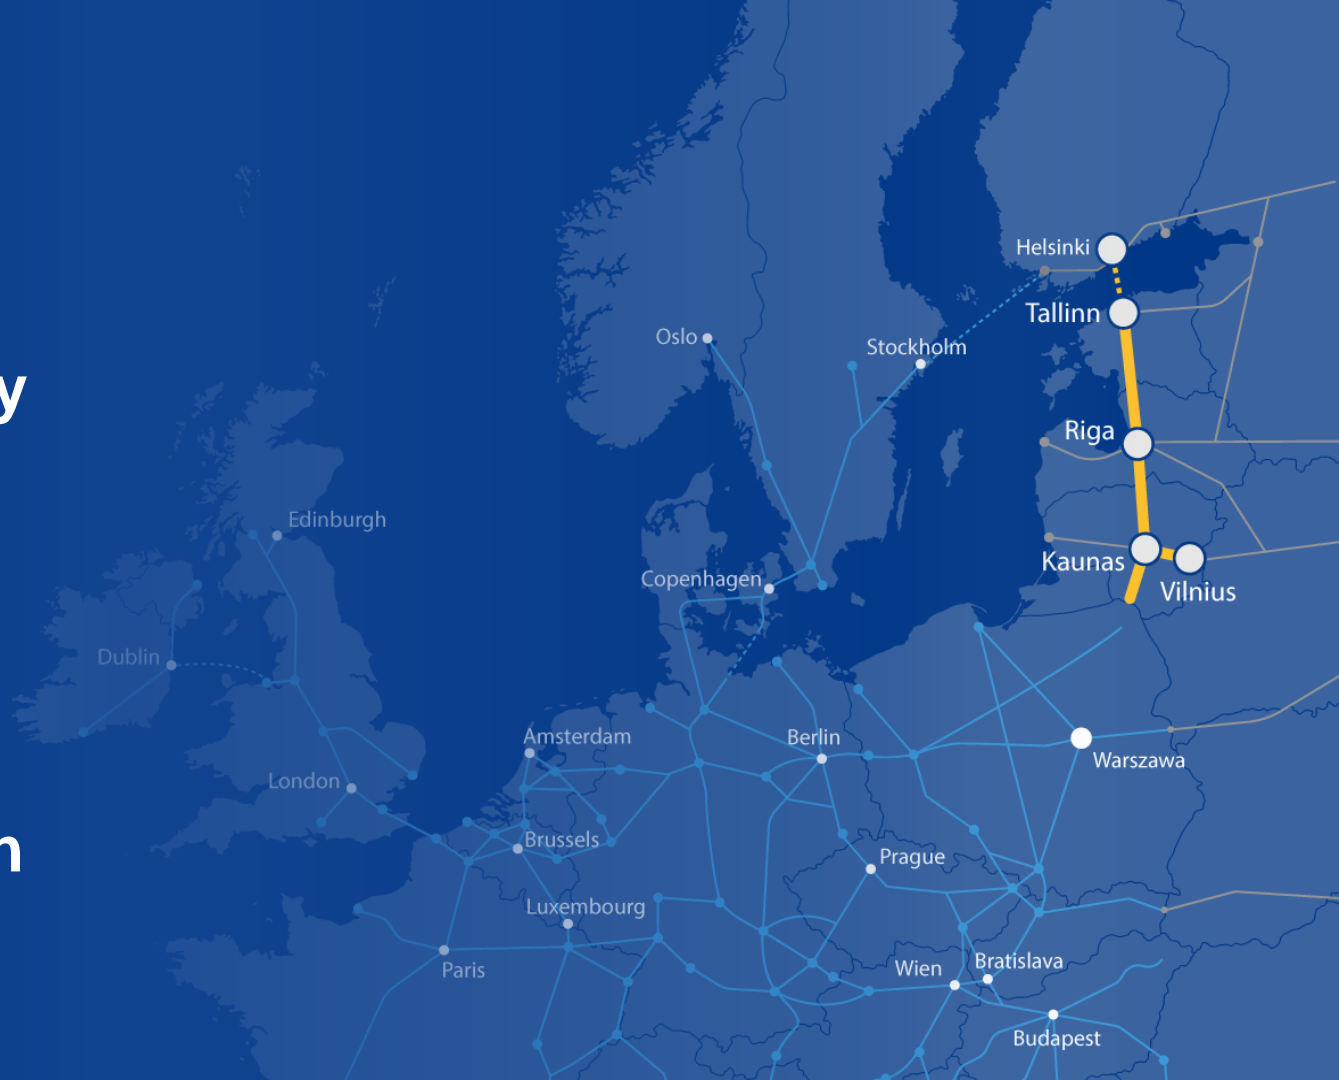

Co-financed by the Connecting Europe
Facility of the European Union

Timo Riihimäki, RB Rail AS

12.09.2019.

- **The project**
- **State of play**
- **Future**
- **Benefits**
- **Cooperation**

A map of Europe with a dark blue background. A white line represents the rail network, with nodes at major stations. The network is dense in Western and Central Europe but sparse in Eastern Europe, particularly in the Baltic region. A specific route in the Baltic region is highlighted in orange, showing a path from the Baltic Sea coast through Poland and into the Baltic states. This route is part of the Rail Baltica project. The text 'Rail Baltica will close the gap in European Rail Network' is written in white on the right side of the map.

**Rail Baltica will
close the gap
in European Rail
Network**

Seamless travel

Easy access to airports

Tallinn to Vilnius in 4 hours

By car or bus takes 10
hours

Night trains

Night trains will enable
to reach Europe by train

Integration of key infrastructure

- Sea ports
- Logistics facilities
- Airports
- City terminals

Cargo train speed 120 km/h

2-3 cargo trains will run on
Rail Baltica line every hour

Multimodal terminals

- Muuga (Estonia)
- Salaspils (Latvia)
- Palemonas (Lithuania)

Political commitment

**Intergovernmental Agreement
and
EC Implementing Decision**

EUR 824 million secured

Up to 85% from the EU

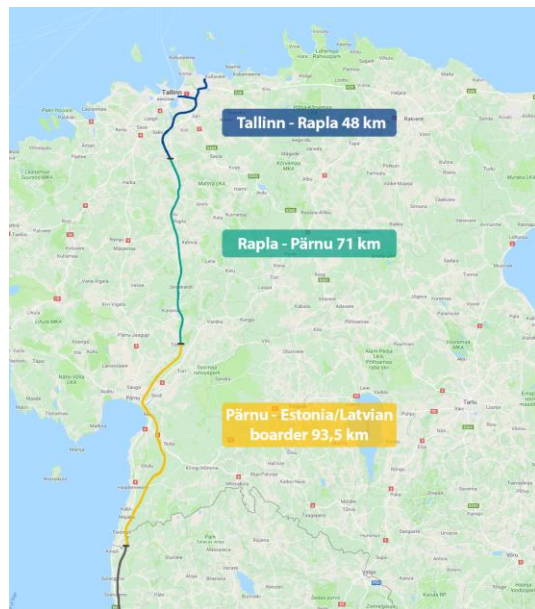

Common procurement standards and guidelines

All countries to follow one policy

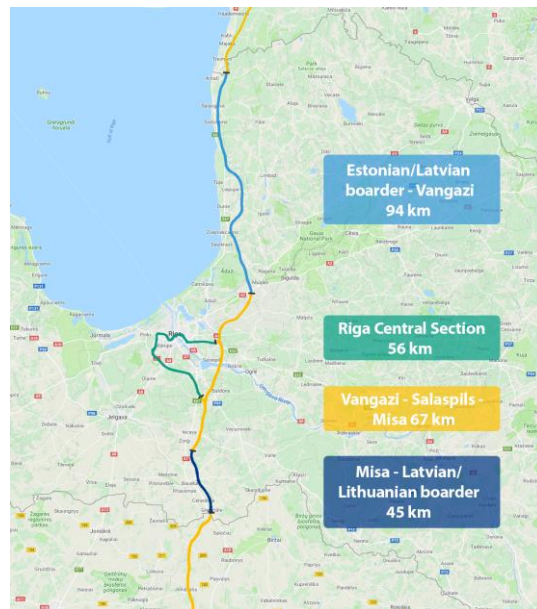

Supplier Surveys

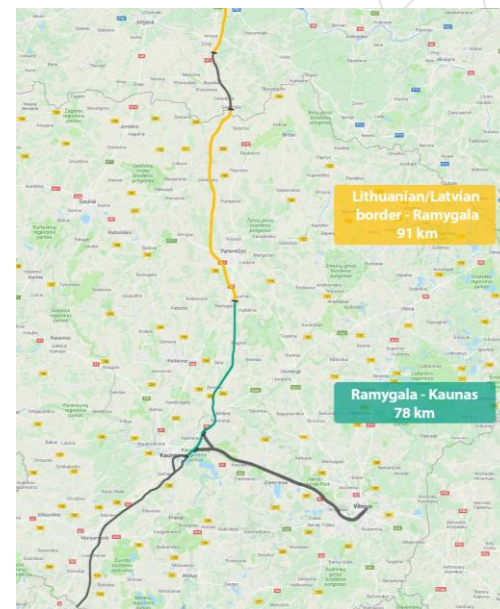

Satisfaction rate: 70%

**From Tallinn to Pärnu
in Estonia**

**Two sections
in Latvia**

**Form Lithuanian/Latvian
border to Kaunas in Lithuania**

BIM Strategy

To manage and deliver
digital information of the
project

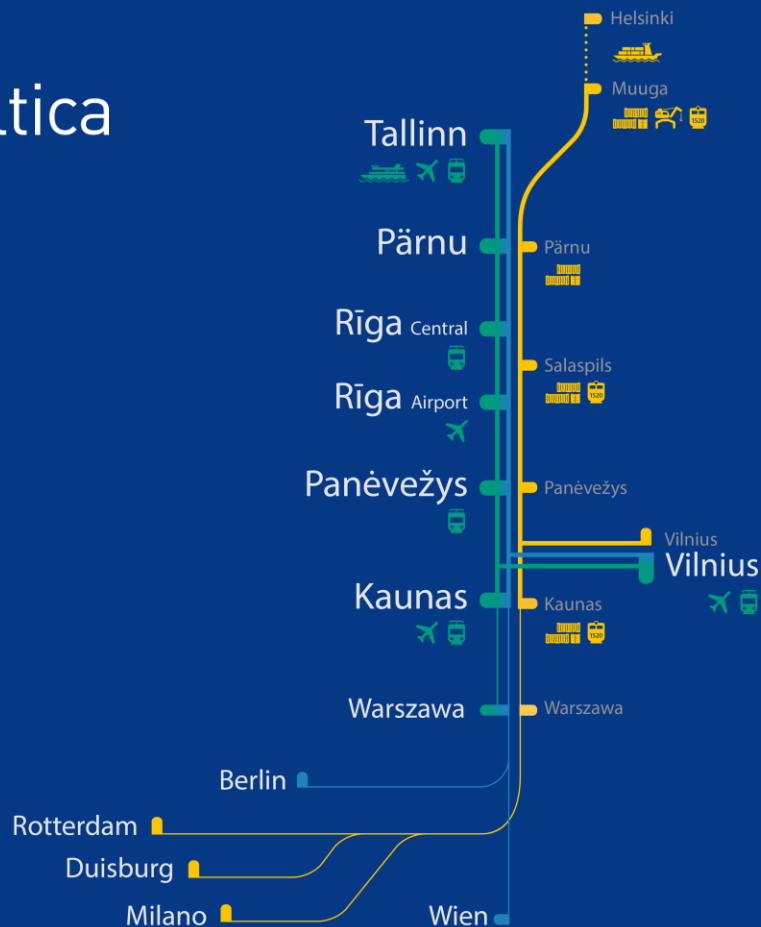

Energy subsystems

Procurement and
deployment strategy
ongoing

Rail Baltica

- High Speed
- Night Train
- Freight

**Multiple
connections for
freight and
passengers**
Seamless inter-modality
for freight and
passengers

**Freight transshipment
between networks**

1/3 of freight forecast by
2050
5m tons

Promote modal shift

Reduce carbon footprint
Sustainable
development

Thank you!
